

Design change E1103L

We adapt our E1103L to the classic Hengst design of the E2059L / E2060L with plastic cover and bottom. The new E1103L is of course also backwards compatible and can be installed in all Mercedes-Benz Actros (963), Antos (963) and Arocs (964) models with front air intake.

Previous E1103L

New E1103L

Stocks of the old E1103L can of course still be sold for the vehicles listed in the catalogue.
